IEP CONVENTION CENTRE, 5TH FLOOR, IEP BUILDING
OPP: HOTEL REGENT PLAZA, SHARAH-E-FASIAL, KARACHI

What is NLP

Neuro Linguistic Programming (NLP) has completely changed the lives of thousands of people worldwide and is said to be the most valuable set of skills, tools and techniques ever put together. It is fast, effective and fun. NLP is the art and science of personal excellence. It teaches you how to use your own mind in more powerful and effective ways to produce the results you want in all areas of life. It is a powerful technology that produces results quickly and easily. The developers of NLP, Richard Bandler and John Grinder had discovered that happiness and success are the results of specific patterns of thinking that can be learned by anyone. With NLP infinite possibilities for learning and changing are available:

You can use NLP to obtain the characteristics of high achievers.

Get motivated to obtain results.

Build your relationships and persuasion skills.

Clear up past negative emotions that have held you back.

Enhance your self-appreciation and self-esteem.

Have solid positive mental attitudes.

Ways of managing your own and others mental states.

Setting achievable personal and professional goals.

Core questioning skills to gather high quality information.

It's all here, how to program your mind for the results you want. This new technology of achievement represents a dramatic leap in human development and People and Organizations all over the world are using and benefiting from the tremendous opportunities offered by NLP for personal as well as professional achievement, success and excellence.

Trainer

The session will be conducted by Engr. Payam Siddiqi, an internationally certified trainer and master practitioner of NLP. He is registered with various NLP Associations and societies worldwide.

By profession he is a Civil Engineer and did his engineering from Ohio University, Athens Ohio, USA. He is Fellow of I.E.P. and has a working experience of more than 30 years managing his family construction business as well as working for Multi National companies like Shell, McDonalds and Total as Department Head and Engineering Manager.

(Prior Registrations necessary to facilitate in making arrangements)

Registered Participants will receive 0.5 Credit Points (Subject to the approval of Pakistan Engineering Council (PEC)).
